*Our greatest contribution as faculty
in the glaucoma department at
Wills Eye Hospital is the creation
and nurturing of future generations of
caring, well trained glaucoma experts
through the Fellowship Program.*

Dr. George Spaeth through his brilliant work, extraordinary dedication, and unbridled passion has placed the Wills Glaucoma Fellowship at an elite level that is highly sought after with an admirable record of achievements with gifted researchers, acclaimed teachers and highly skilled, acknowledged physicians and surgeons. Our faculty strives to continue to be the backbone of the fellowship through their research, education and clinical practice. Through your generosity important contributions to our field that help patients throughout the world will continue with the help of our fellows during their time at Wills but also after their training has been completed. With the aid of the Glaucoma Service Foundation at Wills Eye Hospital the relationship with our fellows remains a lifelong bond. I am deeply appreciative and cannot sing the praises of the Glaucoma Service faculty enough for their dedication, collegiality, skills and willingness to devote their time which maintains our reputation as a premier program to receive care, obtain cutting edge research, and attract fantastic fellows. I have been and remain justifiably very proud of my colleagues. What a wonderful group of physicians.

Thank you all for your generous support!

L Jay Katz MD
